

Audavi Corporation adds 2TB cartridge with >100MB/s transfer rate to MediaPac product line.

San Jose, CA, February 25, 2013 – Audavi Corporation today announced the addition of a 2TB capacity cartridge to its MediaPac® family of portable rugged storage devices. The 2TB cartridge, based on state-of-the-art 2.5-inch hard drive technology, utilizes perpendicular magnetic recording and boasts a rapid 100MB/s sustained data transfer rate.

"Our new 2TB MediaPac cartridge doubles the capacity range of our product line. The 2TB cartridge is compatible with all of our existing interface cables, bays, and towers allowing for seamless integration by our current military, government, and professional customers who continue to demand increased storage capacity and performance," according to Mike Bergkamp, CEO of Audavi.

MediaPac cartridges are designed for users who require convenient portable storage of large audio, video, and data files. MediaPac cartridges are also an excellent solution for military and government applications requiring removable media for data security and system classification. Rugged enough to survive a 2-foot drop onto concrete, the HardTape cartridge is an excellent alternative to tape for client data backup and disaster recovery, medical image storage, and security video recording. MediaPac is significantly faster than "burning" CD/DVD disks for data back-up and archive applications. MediaPac cartridges can move easily from system to system using a bay or cable connection through any of the standard interfaces (USB, FireWire, SCSI, SATA).

Featuring a black anodized aluminum case for additional durability, MediaPac cartridges are pocket-sized, measuring just 130mm x 80mm x 17mm (LWH) and weighing about eight (8) ounces. The MediaPac product line includes 250GB, 500GB, 750GB, 1TB, 1.5TB, and now 2TB models.

About Audavi Corporation

Audavi designs, manufactures and sells a range of rugged portable storage solutions that enable military, government, and professional users to securely record, store, and transport digital video and data. MediaPac® is quickly setting the standard for capacity and performance for removable media in these demanding market segments. Headquartered in the Silicon Valley, with partners in Europe, Australia, and Asia, Audavi sells and supports its products worldwide. For more information, go to <http://www.audavi.com>.
