but NO STANDARD INTERFACE**

HARDTAPE CONNECTIONS

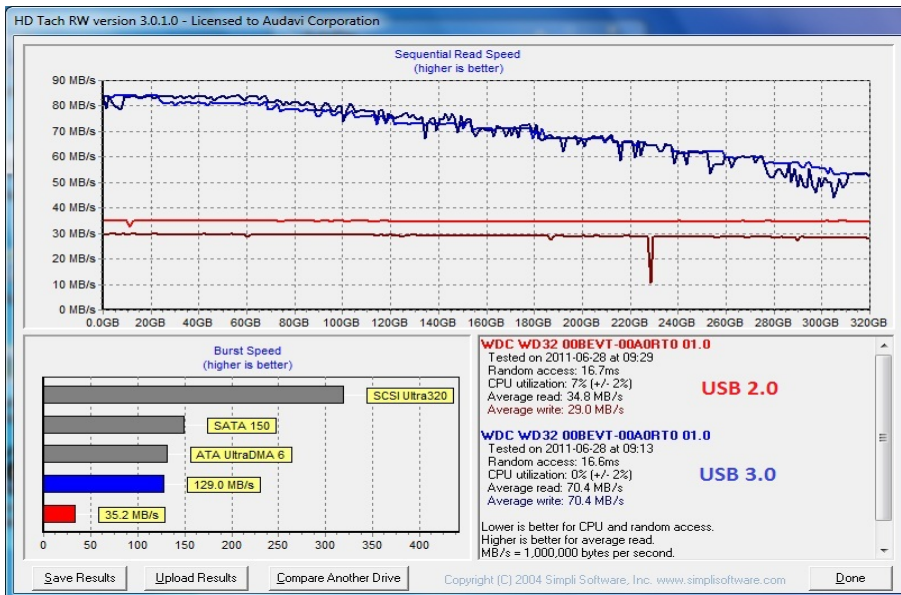

Connect Your Storage to the Past, Present, & Future

The HardTAPE cartridge/cable system features a universal, latching, multi-insertion rated connector that allows you to connect to virtually any system. Cables exist for PCMCIA, USB 1.0/2.0/3.0, Firewire 400/800, i-Link, SATA, and e-SATA interfaces.

All connections are "hot-swap", require no additional software or drivers and provide data transfer rates from 2-90MB/s. The PCMCIA, USB, and Firewire connections also provide "bus-power" for the HardTAPE cartridge.
